Trimming is one of the most complex tasks which require higher specialization in the gardening field. For this reason, one official tree surgeon will be included in the team.

The tree surgeons will be expert in the most modern pruning techniques, knowing the different tree species in the city, showing ability in their daily use of both traditional and modern tools. For that purpose, they will be given the training required for their position.

They will be skilful and expert in climbing, something which is basic to obtain the performance in accordance with the basic needs.

Their main objective is to maintain the trees in perfect condition. This team, given their specific and specialized activity, will work with both the trees in the green areas and with the ones aligned.
